

SPIREXA — AI Landslide Warning

AI-based early warning

Team SPIREXA

Founder(s) / Team Members: Utkarsh (Team Lead) & Team

IIITA Connection:

☐ Incubated Startup ☐ Student Startup ☒ Student Innovation ☐ Alumni Startup

01 PROBLEM / NEED

What problem are you solving?

- NER landslides cut off roads & homes every monsoon.
- Warning today is reactive — only after a slope fails.
- NHPC Teesta-V (Aug 2024) alone: Rs 327 crore lost.

02 OUR SOLUTION

Brief overview of your solution / product / technology.

- Give any NER coordinate + date — risk % in ~10 seconds.
- Live GIS dashboard: 311 hotspots, recalculated daily.
- Alerts auto-generated in 9 regional languages.

03 KEY FEATURES / INNOVATION

What makes your solution unique?

- Trained on 318 real NER landslides (2007-2025).
- Caught & fixed a road-proximity reporting bias.
- Physics (USGS slope-stability) + machine learning.

07 HOW IT WORKS

Brief workflow / architecture / working of your solution.

04 APPLICATIONS / IMPACT

Where can it be used? What impact will it create?

- District control rooms get a daily ranked watch-list.
- Remote villages get warnings in their own language.
- Field officers get offline hazard reporting.

05 CURRENT STATUS

- Development Stage / TRL: TRL-4, lab-validated
- Prototype / Product: ML model + dashboard + Arduino sensor
- IP / Patent (if any): None yet
- Achievements (if any): 0.933 ROC-AUC, 87% landslides flagged
- Recognition / Awards (if any): None yet

06 FUTURE PLAN

What are your next milestones?

- Arduino ground-sensor node feeding the live dashboard.
- SMS gateway integration (logic ready, account pending).
- Validation partnership with GSI / state disaster mgmt.

08 LOOKING FOR

- ☐ Industry Collaboration
- ☐ Investment / Funding
- ☒ Mentorship
- ☐ Other: _____
- ☒ Technology Partnership
- ☒ Pilot / Deployment
- ☐ Talent / Internship
